About This Game

Cyber Ops is a story-based tactical hacking game, told from the point of view of a mission control supervisor, operating from the distance.
You are the eye in the sky, the invisible hand, the cyber ghost, looking after your team over the net.

Cyber Ops is an innovative take on the stealth / hacking genre that explores the relationship between the operator and real people on the other end of the line through immersive narrative and challenging gameplay.

Story

The young nation of Baltia has earned its right to freedom after a long and painful war, but now the stakes are higher than ever before.

You are part of the **Geist Division**, a secret high-tech unit created by the government to protect the country from all kinds of next-gen threats. As the Operator, your mission is to provide remote support to a group of spec-ops agents deployed in urban terrains. You must control devices and systems with your deep hacking abilities, and scan the environment to provide the safest routes for your squad.

Features

- More than 6 hours of story missions full of cyberpunk themes, investigation and political intrigue.
- Real-time audio feedback from squad leaders brings life to the world of Cyber Ops.
- Different hacking mechanics to keep control of doors, security devices and cyberlink-equipped brains.
- Squad management: recruit new blood for the infiltration squads.
- Research and Development: develop new weapons and cyber-implants to improve the agents performance.
- Retro-futuristic computer interfaces and dark analog synth-based music inspired by 80's cult movies.

Title: Cyber Ops

Score: 0 of 64
Snail Trek - Ch 4

Hello there, Cyber Operators!!:
We are thrilled to reveal **Cyber Ops: Tactical Hacking Support**!!, our own take on mission support simulation.

This project can be traced back to 2017, where it all started with a few simple questions...

- How would a stealth game like Metal Gear or Splinter Cell look from the perspective of the people in charge of radio/satellite support?
- How can we create a bond with the agents on the other end of the line?
- How can we make this new perspective a challenging and engaging experience?

With Cyber Ops, we are looking to provide an answer for these questions by creating a deep, real-time experience where real agents depend on you to complete their missions and get back to base in one piece.

Our take is a story-based novel experience, where you will assist the top agents of Baltia's Geist Division; strong characters facing complex missions in a tech-noir cyberpunk world.

Political intrigue, conspirations, high-tech body upgrades, brain hacking, mechs, synths and everything we love about movies like Ghost in the Shell, Blade Runner, Escape from New York, Alien and more.

We really hope you like the vibe of Cyber Ops. We are a passionate team and this is the kind of game we've been wanting to make for a long time, so we are giving our best to deliver the coolest cyberpunk experience you can get in 2019 ;)

Feel free to post any questions or feedback! We're looking forward to talk with you!

Thank you all,

Julio Marambio
